

WHY ARE MORE COLLEGE AGE WOMEN GETTING BREAST CANCER?

A 2023 JAMA STUDY SHOWED BREAST CANCER HAD INCREASED 5.3% IN WOMEN 20-29 YEARS OLD.

DR. LANFRANCHI WILL REVIEW THE STUDY RESULTS AND DATA THAT COULD ACCOUNT FOR THIS ALARMING INCREASE.

MONDAY, APRIL 8TH
INSALACO HALL 218/219 • STARTS AT 6^{PM}

The event will be open to the campus community and the public.

Angela Lanfranchi, M.D., FACS, is a retired breast cancer surgeon who practiced in New Jersey for over thirty years. A 1975 graduate of Georgetown School of Medicine, she is a clinical assistant professor of surgery at Rutgers Robert Wood Johnson Medical School, a Fellow of the American College of Surgeons, and is certified by the American Board of Surgery. She was surgical co-director of the Breast Program at The Steeplechase Cancer Center in Somerville, New Jersey for 10 years. She saw over 20,000 breast patients in her career.

She is co-founder and president of the Breast Cancer Prevention Institute, a non-profit charitable corporation that has as its mission to educate lay and professional communities in the methods of risk reduction and prevention of breast cancer through research, publications, and lectures. She was named a Castle Connelly Medical Ltd. New Jersey "Top Doc" for Women's Health in Breast Surgery and an Inside Jersey's Top Doc for Cancer. She is the author of articles on the physiology and epidemiology of abortion and breast cancer risks and informed consent.

Event is sponsored by the Department of Religious Studies
